

FIRE SAFETY MANAGEMENT POLICY OF KOZLODUY NPP EAD

The Fire Safety Policy is an important element of the nuclear and the general safety of the Company. The Management has set the following **objectives**:

- effective protection of the personnel and the production process from fire and combustion products;
- protection of nuclear facilities, nuclear material and radioactive substances from fire or combustion products;
- preventing and/or limiting fire hazards to the highest degree;
- enhancing personnel practical knowledge on ensuring fire safety.

In order to achieve the fire safety objectives, the Management implements the following **principles**:

- maintaining and developing of high fire safety culture;
- prevention of fire from starting;
- fast detection and prompt extinguishing of fire;
- limiting fire spread.

When implementing the Fire Safety Management Policy of Kozloduy NPP EAD, the Management applies a set of engineered safety features and organisational arrangements for defence-in-depth for fire protection.

The Plant Fire Safety Management Policy is communicated to all the Company employees and each and every one of them is responsible for the implementation of its principles in their efforts towards achieving the set objectives.
